Introducing...

EZ-sensor™

Programmable Tire Pressure Monitoring Sensor

(Part No. 33000)

(Part No. 34000)

- **Eliminate lost sales**
- **Optimize inventory levels**
- **Reduce risk of installing the wrong part**
- **Increase speed, ensure accuracy, and reduce cost of servicing TPMS equipped vehicles**
- **Works with the Schrader® and Bartec® OBD learn tools you already own**
- **Program a duplicate set of wheels and tires to match the OE vehicle**

...Always Have the Right Part, Right Away

EZ-sensor advantages:

- Schrader patented technology offers a truly programmable solution with snap-in & clamp-in options
- EZ-sensor performs identically to the original OEM-equivalent
- The EZ-sensor comes blank and is fully programmable to the selected vehicle type
- Initial EZ-sensor (315 MHz) coverage includes specific vehicles for Ford®, Lincoln®, Mercury®, Mazda®, GM®, Toyota®, Lexus®, Scion®, Nissan® and Infiniti® (see EZ-sensor application guide)
- In late 2011, a second sensor (433 MHz) will be introduced
- Two EZ-to-program snap-in sensors will eventually replace over 90% of OEM SKUs
- Parts include EZ-sensor (Part No. 33000); Snap-In Service Pack (Part No. 20008); Aluminum Clamp-In Service Pack (Part No. 34000)

Order EZ-sensor today. Software updates are now available.
