

Brake Service Solutions

Problem: The growing number of adapters required to mount hubless rotors & drums through 1 ton vehicles

- Because of the large range of center-hole sizes on rotors and drums, adapter sets must contain numerous centering cones.
- It takes time for the technician to select the proper cone.
- Centering cone sets require a significant amount of storage space..

Solution: Double Chuck Kit

Part No. 941412

- AMMCO's exclusive new Double Chuck Kit has 2 sets of concentric, expanding jaws to grip the center-hole and **eliminate the need for cones.**
- Passenger car jaws are permanently mounted on one side and truck jaws are permanently mounted on the other side. **No need to change out jaws.**
- **Only 6 pieces** to choose, to store, and to maintain.
- Handles virtually all hubless drums and rotors (including composite) through 1 ton. vehicles (Range: 2.125" – 5.75").
- Kit includes Double Chuck, 4 backing plates, & chuck key.
- Fits any 1" lathe arbor.

Hennessy Industries, Inc.
