

COATS®

Tire Service Solutions

COATS ACP

(ADVANCED CLAMP POSITIONING)

NOW ON 70X & APX MODELS

COATS Tire Changers offer operators exceptional range capabilities. Even with the rugged adjustable X-clamp system, it is possible for soft sidewall tires to get caught in the clamps. But with COATS ACP, you can pre-position the clamps quickly, easily and accurately to the size needed.

- Position clamps exactly where needed
- Full control forward and backward
- Stop and hold in place while you mount the wheel
- Speed up clamping—clamps don't have to travel the full range for each tire
- Reduce the risk of catching a tire
- Reduces chances of rim damage
- Now installed on Coats 70X and APX series Rim Clamp Tire Changers
