

Problem: It is difficult to know which type of adapter or combination of adapters to choose that will best mount a wheel on the balancer.

- The growing number of wheel center designs both hub & lug centric
- The wide range of custom, after-market wheels
- Changing tolerances in wheel & hub dimensions
- Required training for technicians can be complex

Solution: Pin-Plate Systems

With Balancer Mate

With 11 Hook Storage Panel

- One system is both universal and comprehensive
- Will cover over 90% of all passenger car and light truck applications
- Applies to both hub & lug centric wheels
- Most consistent method for providing accurate mountings for a large variety of wheels compared to other adapter combinations
- Available in both 28mm & 40 mm I.D.
- Avoids having the technician have to decide to back cone, front cone – this one system is the best solution for mounting most wheels
- *System Includes: Pin-Plate numbers 1 through 4, choice of adapter storage, 3 sizes of color coded pins, pin storage basket, hole gauge, application chart, video, instructions*
- Components, including individual Pin-Plate Kits, are available for those who choose to build a smaller set tailored to their requirements
- Intuitive bolt pattern arrangements on plates for easy pin placement
- Color coded pins for quick identification
