

Special Applications Light Truck Cone

A modified version of the Coats large truck cone, this eliminates the need to use a faceplate extension (or “Viper” spacer) and a spacer cone when mounting wheels in certain light truck/SUV applications.

- Experience more reliable and repeatable mounting
- Increased ease of use with pin plates and fixed finger plates (by eliminating the need for the faceplate extension and spacer cone, you don't “run out of shaft” when trying to use the plates).
- 40mm I.D.

- Applications include Toyota Tacoma, Land Cruiser, Sequoia, and some Nissan light trucks, among others.
- Currently available for XR-Series balancers only.
